**6.2.2015**

# CONTENTS:

## 1. Admin Folder

- 1.1 Added support for Division Permissions**
  - This will allow clients to be able to dictate access by division across the Style, Silhouette, Line List, Line Plan, Sourcing, Dev Calendar folders.
- 1.2 Connection Info section automatically updates based on environment settings**
  - This will allow admins to easily see what connection settings are needed for Adobe Plugin, Mobile Apps, Toolkit and CAD setup
- 1.3 Connection Info section now has an About tab that lists all Plugins that the application is using and their version numbers**
- 1.4 User can now select which folder they want the application to default into on login**
- 1.5 User Group > Control Panel Permissions are now alphabetized**
  - This will allow admins to easily be able to view and set permissions across control panel entries

## 2. Application General

- 2.1 Wait spinner image has been added to all application pages**
  - A user will now see the wait spinner image on any page while it is saving
- 2.2 Dropdown loading process has been improved (Lazy Loading)**
- 2.3 Floating headers have been added across the application**
  - This will allow users to access key buttons and functions regardless of scrolling
- 2.4 Ability to export search grids to Excel (User Defined Reports)**
  - Users can now export a large number of search grids results to excel. Along with search filtering, ability to add/hide columns/group by column information / saved searches, users can now create extracts as needed.

- *Color Folder, Material Folder, Style Folder, Line List, Line Plan, and Sourcing Folder to name a few*

#### **2.5 *Saved Searches will now retain Grid Filtering***

- *Users can now create saved searches that will not only retain the search filters but also any grid level filtering that might have been made*

#### **2.6 *Created config option to disable dropdown translations***

- *An option has been added to enable/disable dropdown translations across the application that if disabled can offer a performance increase on page loading*

#### **2.7 *Entry added to enable/disable Duty Category validation for Main Material check box selection within Line List/Line Plan Material Palette pages***

- *If disabled users can now select materials as Main Material within the Material Palette pages without having to have setup Duty Category information*

### **3. Dev Calendar**

#### **3.1 *A popup warning has been added to Save work before leaving the page***

#### **3.2 *Duration and Dependency columns have been moved to make them easier to view/update***

### **4. Color Folder**

#### **4.1 *Added the ability to create Color Chip images directly from Images in the Image Folder***

- *Users can now Select / Create color chip images based on files that are available within the Image Folder reducing the steps to access or update files*

#### **4.2 *Added A&E Thread color libraries***

### **5. Control Panel**

#### **5.1 *Size Range > Description is now editable even if it is being used***

- *Previously this field was locked down if being used in templates or on products*

- 5.2 *Added ability to drag and drop workflow sorting within the setup pages for Dev Workflow and Material Request Workflow*
- 5.3 *Added ability to upload Care Images along with care instructions*
  - *Previously this information was only available for Gerber Staff to edit*
- 5.4 *Size Range and Size Class Codes can now allow for more than 5 characters*
- 5.5 *Added ability to search for control panel entries*
  - *As our application continues to grow and more controls are made available to administrators we've made it easier to find the control panel entry you are looking for*
- 5.6 *Added ability to support Key Point of Measurements within the Measurement Templates*
  - *Key Point of Measurements allow a client to add a huge amount of POMs to a template then dictate which ones should appear on a product by default when the template is used.*
- 5.7 *Added ability to support duplicate POMs*
- 5.8 *Added ability to copy measurement templates*
- 5.9 *Added ability to modify the measurement template description even if it is being used on products*
- 5.10 *Added ability to select multiple division in the measurement template dropdown selection*
- 5.11 *Added ability to create and manage Sample Request PreDefined Print Options*
  - *System Admins can now manage their own predefined sample request print options by sample request type*
- 5.12 *Division Control Panel > Added Configuration option to auto populate Size Dimension in the BOM*
- 5.13 *Division Control Panel > Added Configuration option to limit the colorway selections to the colorways defined in the Line Plan*

## **6. Image Folder**

- 6.1 *Added ability to open the image from the search screen by clicking on the Image itself*
  - *Users can now access images in the image folder search screen by clicking on the thumbnail image vs the edit image button*
  -

## **6.2** *Images can now be downloaded for editing vs Open Folder option*

- *Config Option that can be enabled or disabled as desired for existing clients*

# **7. Line List Folder**

## **7.1** *List View option has been added to the Add Existing Styles search page*

## **7.2** *Added Dropped filter on Line List Style View*

## **7.3** *Sample Request > Create Quick Sample Enhancements*

- *Flashed Edit added to quickly assign Sample Templates and Start / End dates*
- *Updated search with filters for Dropped styles and styles with Samples already requested*
- *Measurement Templates and BOMs will now default in if only one option is available*

# **8. Material Folder**

## **8.1** *Implemented Grid Controls to Material Search page*

- *Users can now define columns and group by columns as desired for advanced filtering options*

# **9. Sample Request**

## **9.1** *Added column to track BOM on the Sample Request search pages*

## **9.2** *Removed 2 page refreshes on saving a Sample Request submit*

- *Previously the application required 2 screen refreshes when saving/updating information within a sample request submit*

## **9.3** *Added ability to support Accumark 3D and Standard 3D files within the sample request attachments*

- *Users & partners can now upload and view Accumark 3D files or STL & OBJ 3D files within the sample request attachments area with the desire to help reduce the number of physical samples. Users can also take a snapshot of the 3D file and send it to the markup tool for commenting*

- 9.4 *Additional Sample Request Summary print options have been added*
  - *Users can now print summaries of the entire sample request submit process for an individual submit type. Submit Summary, Spec Summary, Comment Summary, Photo Summary*
- 9.5 *Sample Request Edit Spec > users can now Link & Break Link POMs*

## 10. Style Folder

- 10.1 *Added 3D Images workflow page*
  - *Users can now upload and view Accumark 3D files or STL & OBJ files*
- 10.2 *Style Header Modified By and Modified Date updates*
  - *The Style Header now displays the most recent user and date that any page within the style was updated*
- 10.3 *Style Number is now visible along with the Size Class in the Style Navigation tree*
- 10.4 *Style BOM > Reduced the number of scrollbars from 4 to 2 when working on the BOM page to make it more user friendly*
- 10.5 *Style Design Image > Users can now select an image by clicking on the thumbnail vs the checkbox selection option*
- 10.6 *Style Seasonal Colorway > Removed Color and Season & Year buttons*
- 10.7 *Style Measurement Page > Only Key POMs will be added to the page when adding a template by default*
  - *When a user adds a measurement template to a style the POMs that have been identified as KEY will default in. All other POMs within the template will be available to add in view the existing POM Template button*
- 10.8 *Style Measurement Page > Added ability to support Duplicate POMs*
- 10.9 *Style Tech Pack > If no images are being used on the Artwork, Design Detail or Text Image pages the page will not generate*

## 11. Report Updates

- 11.1 *Style Process Details - Process Details Print Preview Updates – Added 3 User Defined and 5 User Defined Print Options*
- 11.2 *Style BOM - Updated BOM Colorway Print Preview*
- 11.3 *Style BOM – Updated Printout headers to pull in BOM Name*

- 11.4 Style Text Image – Updated Text-Image Portrait option to include 2 images per page*
- 11.5 Color Folder – Color Palette Name now included in printout header*
- 11.6 Color Folder – Color Palette Details Print Preview – Includes additional color attribute fields*
- 11.7 Color Folder – Color Palette by Seasons printout added*

## **12. Adobe Plugin**

- 12.1 Added Plugin Validation for PLM and the version of Adobe being used*
